

linkedlist_insert_at

linkedlist_push_head

linkedlist_push_tail

get_node

```
graph LR; A[linkedlist_insert_at] --> D[get_node]; B[linkedlist_push_head] --> D; C[linkedlist_push_tail] --> D;
```

The diagram illustrates a dependency or call relationship. On the left, three white rectangular boxes are stacked vertically, each containing a function name: 'linkedlist_insert_at' at the top, 'linkedlist_push_head' in the middle, and 'linkedlist_push_tail' at the bottom. On the right, there is a single gray rectangular box containing the text 'get_node'. Three blue arrows originate from the right side of each of the three white boxes and point towards the left side of the gray box, indicating that each of the three functions on the left calls or depends on the 'get_node' function on the right.
