

geometry_generate_normals

mat4_look_at

vec3_cross

```
graph LR; A[geometry_generate_normals] --> C[vec3_cross]; B[mat4_look_at] --> C;
```

The diagram illustrates the dependencies of the `vec3_cross` function. It features three rectangular boxes. On the left, there are two boxes: the top one contains the text `geometry_generate_normals` and the bottom one contains `mat4_look_at`. On the right, there is a single box containing `vec3_cross`. Two blue arrows originate from the right side of the left-hand boxes and point towards the left side of the `vec3_cross` box, indicating that `vec3_cross` depends on both `geometry_generate_normals` and `mat4_look_at`.
