

vec3_u

```
graph BT; geometry_config[geometry_config] -.->|centre| vec3_u[vec3_u]; geometry_config -.->|max_extents| vec3_u; geometry_config -.->|min_extents| vec3_u;
```

The diagram illustrates a dependency between two variables. At the bottom is a grey rectangular box labeled 'geometry_config'. At the top is a white rectangular box with a black border labeled 'vec3_u'. A vertical dashed purple line connects the top of 'geometry_config' to the bottom of 'vec3_u', ending in a solid purple arrowhead pointing upwards. To the right of this arrow, the labels 'centre', 'max_extents', and 'min_extents' are stacked vertically, each preceded by a short vertical purple line segment, indicating that these three attributes of 'geometry_config' are used to calculate 'vec3_u'.
